VALVOLINE™ WATER REMOVER

DESCRIPTION:

Water is almost always present in fuel, either as results of contamination or condensation. This water may lead to ice during winter or rust during any season. Both can lead to serious issues that inhibit fuel flow by clogging filters, injectors or other critical passages. Even worse, possible complete fuel system failure.

Valvoline Water Remover is a premium isopropyl-based water remover that safely and effectively removes water from fuel systems. Unlike methanol-based formulas that simply force the water out of solution to the bottom of the tank, **Valvoline Water Remover** holds the water in suspension and carries it through the combustion process without damage.

Recommended for year-round use with gasoline or diesel fuel. Ideal for automobiles, trucks, tractors, motorcycles, boats, snowmobiles and construction equipment. It will not damage oxygen sensors, catalytic converters or injectors. This product complies with the federal low sulfur content requirements for use in diesel motor vehicles.

Keep away from heat, sparks and open flames. Use only with adequate ventilation.

Part Number	Description	Unit UPC
602247	Valvoline Water Remover 12/12 oz.	0 74130 79077 3

BENEFITS:

- Removes water from fuel systems
- Stops gas line freeze
- Safe for fuel injectors, oxygen sensors & catalytic convertors
- Great for year-round use

TECHNICAL DATA:

Specific Gravity	0.79 at 60°F
Appearance	Clear, Colorless Liquid
